- ✓ Remove the gauge and begin sawing.
- ✓ It's that easy!
- ✓ The tool provides a digital readout to the nearest half thousandth of an inch.

| Distance of Blade Stretch | Approximate PSI Exerted on Blade |
|---------------------------|----------------------------------|
| 0.0020" | ≈ 10,000 PSI |
| 0.0035" | ≈ 15,000 PSI |
| 0.0045" | ≈ 20,000 PSI |
| 0.0060" | ≈ 25,000 PSI |
| 0.0070" | ≈ 30,000 PSI |
| 0.0080" | ≈ 35,000 PSI |
| 0.0095" | ≈ 40,000 PSI |
| 0.0110" | ≈ 45,000 PSI |

A simple cross reference chart shows the approximate PSI strain per distance of stretch.
No finicky dial indicator needle to read. Just a straight forward digital numeric reading.

Know your machine's optimum number and hit it.
